SANITARY CIRCUMSTANCES OF THE AREA

Water

Number of samples taken for analysis :-

(a) from wells 34
(b) from piped supply 8

Results of samples taken :-

from wells - Satisfactory 9
Unsatisfactory 25
from piped supply- Satisfactory 8
Unsatisfactory -

Number of wells:

(a) closed -
(b) cleansed 11

Number of cases in which piped supply was
substituted for well water 127

Number of Parishes without a piped water
supply 4

Number of houses now on piped supply 2,392

Number of Parishes and part Parishes with piped
water supply :-

(a) from public mains 19
(b) from private reservoirs 4

Sampling of some of the public wells has been carried out.

Existing Water supplies

The Parishes of Ab Kettleby, Asfordby, Broughton and Dalby, Clawson and Harby, Stathern, Waltham (Thorpe Arnold Ward), Eaton (Eastwell Ward), Somerby (part), Burton and Dalby (Burton Ward), Sproxton (Sproxton and Saltby Wards), Gaddesby, Garthorpe, Grimston, Bottesford, Wymondham, Hoby, Knossington (Knossington Ward) and parts of Scalford and Buckminster (Sewstern Ward) are supplied from the Council's Mains.

The Council during the year acquired the Private Supply at Knossington (Knossington Ward) and carried out extensions of the mains.

A scheme in the Parish of Buckminster (to supply part of Sewstern Ward) was also carried out.

Stand pipes are not provided, the services being laid on to the Consumer's premises.

There is no indication of any tendency to plumbbo solvency.

The Parishes of Belvoir, Buckminster (Buckminster Ward) and some farms and houses in Knossington (Cold Overton Ward), and Croxton Kerrial are supplied by private piped supplies.

The rest of the District is supplied from public and private wells. The majority of the wells are 'shallow wells' of doubtful quality, and in many cases insufficient in quantity during dry periods.

Shortages have been experienced, particularly in Barkestone and Great Dalby, and Waltham and Croxton Kerrial, and it has been necessary to cart water to these villages during the summer and autumn months.

The Council are at present investigating sources of supply with a view to providing a piped water supply throughout the whole of the district.

Drainage and Sewerage.

Number of cesspools in the District				
at the end of 1952	295
Number of cesspools abolished during				
the year	8
Number of cesspools constructed				
during the year	6

There have been no new works of sewage or major improvements to existing works during the year, but in accordance with instructions previously given the necessary ironwork was ordered for a new Sewage Disposal Works at Rotherby, an extension to the existing works at Long Clawson, and a Sewage Ejector for Harby to pump back into the Village Sewer sewage discharging into the Canal. Schemes are being prepared for these works to be carried out as soon as the necessary ironwork is delivered.

Schemes are also being prepared for the Villages of Bottesford, Scalford and Wymondham. As conditions improve in the building and engineering trades, certain other villages will receive consideration as in many cases the need for sewage disposal works is becoming urgently necessary.

Closet Accommodation.

Total Number in the District at the end of 1952 :-

(a) Privies	351
(b) Pail Closets	2,938
(c) Water Closets	2,227

Public Cleansing

During the year the Public Cleansing Service has been maintained and efficient service given with a fleet of modern vehicles comprising :-

1 Dennis	11 cu. yd. Refuse Collector
1 S.D.	11 cu. yd. Refuse Collector
1 S.D.	13 cu. yd. Refuse Collector
2 S.D.	Combined Nightsoil and Cesspool Emptiers - 800 gal. capacity

and

1 Dennis Refuse Collector on Salvage work.

Trailers were purchased during the year for the collection of salvaged paper, during normal Refuse Collections.

Household refuse is disposed of by controlled tipping and no difficulty has been experienced here. The disposal of nightsoil is to farms, when it is ploughed into the land as manure. There is at present no difficulty in disposal, and in view of the amount of ploughed land it is not anticipated that this will create a problem for the next year or two. The cost of nightsoil collections however, is continually rising and the Council should, as soon as possible, give serious consideration to the conversion of pail closets to water closets in order to reduce the cost of this service.

The present system of conversion is by voluntary methods and has resulted in the conversion of 42 pail closets to water closets during the year. This has no material influence in reducing the cost of the service, but if it were possible to arrange for the conversion of villages en-bloc a considerable saving would no doubt result.

The collection of salvage was continued during the year and the following weights of salvage were collected :-

45 tons Baled Paper
73 tons Baled Tins.

The revenue produced from this source during the year was £857. 0. 0d.

The Council is continuing to empty cesspools on request from the occupiers at a standard charge. There is, however, no collection of the contents of privy middens within the area.
